Subject: RE: Massey docket

Tom,

The troll was discovered when I gave a tour to John Roger and Mike Feder (TJB: in 1985). I then talked to Jim Gordon about it, who confirmed the troll issue. Jim put me onto Jim Herweg (who was Su Bibik's husband and had been delivering energy work personal services for John Fetzer). Herweg dowsed the land and consulted with someone else locally (don't remember who) who installed the medicine wheel. The wheel sits right on top of one of the ley lines. Herweg also planted some crystals in the other ley line. The ley lines cross under the building just north of the loading dock. After the ceremony, we didn't have false alarms. What makes the story a little clouded is that Dave Miller took over for me to get the control systems completed. He had Honeywell replace all of the sensors. Dave's story is that the sensors were faulty, but he never bought into the psychic side of the story.

Jim Herweg is dead. Jim's report, with a drawing of the troll, was thrown out by Glenn Olds. Glenn wanted to clear cut the trees from his window to the lake. The Herweg report was used by John as a caution about desecrating the property, so Glenn just threw out the report.
